Internship / Research Project

GUIDELINES FOR THE PROJECT

As a part of the curriculum requirement, the students are required to undergo training at a project site for a duration of 16/18 weeks, with the major objectives of exploring various technical processes, tools & techniques, domain knowledge and the corporate work culture. This booklet presents a detailed outline of the guidelines for the Internship / Research Project.

GUIDELINES:

Project Selection Criteria

1. The Project assignment is to be carried out at an industry/research or professional organization or similar body, herewith called the Project Associates. The institute will select the Project Associates; however, the student can suggest any particular organization as his/her Project Associates. The institute would take the final decision. In both cases, the student must obtain a NoC from the III cell and submit the Project Allotment Letter to the department (Internship / Research Project Coordinators/Faculty Advisors) before joining the company. Student has to select project with one company only, thus student would be issued a Project Allotment Letter for only one company. Further, the student would not be allowed to change the company once selected. Also make sure all students must submit a Xerox copy of the NOC to concerned Internship / Research Project Coordinators/Faculty Advisors.
2. Those students who are already placed in companies and those companies are providing project placements, are also required to join the same company for project training as well.

Joining the project

1. The semester will commence from 22-12-2025, hence the expected time to initiate the Internship at the company should be the same. Students are required to submit the details about the companies not later than a week from commencement of the semester (i.e. 29-12-2025) after which no requests from students will be entertained for joining any company for projects.
2. The student is required to send a Internship Joining Report (IJR) to the department, preferably on the very first day, after completing the official formalities of joining the project associates. A format for Internship Joining Report (IJR) is separately enclosed. The student has to submit the Internship Allotment Letter to the company on the very first day of joining the company.
3. If the student is not allotted a project by the Internship associate within fifteen days of the commencement of the semester, he/she should immediately report to the department on the sixteenth working day without fail. Then, students are required to work on an in-house research project at the campus.

Attendance

1. The student is required to attend/participate in various activities with Internship associate, for six days a week, and working for minimum 8 hours per day. The total attendance at the Internship associate should be for 16/18 weeks. Student should not remain absent at the Internship Site without permission.
2. For those students who are doing a Internship in companies within Gujarat, they need to regularly remain present at the department from 22-12-2025 till actual joining at company. Those students who are doing Internship outside Gujarat need to regularly remain present at the department from 22-12-2025 till 5 calendar days before actual joining at the company. This is in order to avoid any consequences due to less attendance till the company initiates the project allocation to the students. Moreover, this is applicable to those students only whose Internship starting date is after 22-12-2025.

Project Guidance and Review

1. An internal Faculty facilitator/Internal Guide will be assigned to every student's Internship by the department. The student is required to send various reports periodically to the internal guide at the department. This is compulsory and part of the curriculum requirement of Internship training. A separate schedule for submission of various reports is enclosed (Annexure II). The student must strictly observe the submission date while sending reports.
2. The student's Internship Progress will be reviewed three times during the entire semester, as per the academic calendar. For all Internship reviews, the student reports to his internal faculty guide and makes a presentation regarding the Internship progress in front of the panel of faculty members, which includes the Internship guide. Usually, the presentation is scheduled on the working Saturdays of every review week. Changes will be informed to the students if any.
3. For the students doing Internship outside Gujarat, the first review will be conducted online. However, for the second and final review, the students have to report in person for an on-campus review.
4. During all reviews, students have to represent all technical specifications and data of the project i.e. your presentation should be complete in all respects to grade it. If you feel that technical stuff and data are confidential in nature, then you are advised to take one more definition from your internal guide of Nirma University and work on that under his/her guidance. In all such cases, the second definition will only be considered for academic/reporting/grading purposes and be sure that your industry project is sufficient enough to cater/justify the need of credits allotted to your course(project).

1st Review Criteria

The student would be evaluated for the first phase of the system development life cycle that is analysis phase during his first review. The Student has to make the presentation in front of the panel of Faculty members that also includes the faculty facilitator. The following are the guidelines for the 1st Review.

- Students should have submitted the IJR and IPR.
- Students has to briefly describe the Internship definition and the scope of the Internship.
- He/She has to discuss the tools and technology that would be used for the design and development of the project.
- Students also have to discuss the system requirement study with their project guide. He also has to submit the Internship engagement schedule and the project development plan (Gantt Chart).

2nd Review Criteria

The Student would be evaluated for the second, third, and forth phase of the system development life cycle, which is designing, coding and testing phase during the 2nd Review. The Student has to give the presentation in front of the panel of faculty members that also includes the faculty facilitator. Following are the guidelines for the 2nd Review.

- Student has to make a presentation covering the Internship Progress till date. Students can include the proposed features of the system, the Analysis and design documents as well as the problems related to the system design, tools and technology.
- The current progress would be compared with the Internship engagement schedule and the project development plan, which was submitted during the 1st Review.

After the 2nd review, the Internal Facilitator/Internal Internship Reviewer would evaluate the regularity of the student, his system knowledge as well as the approach and methodology adopted by him to design and develop the system. His documentation and presentation skills would be evaluated also. If the faculty finds the Internship progress very slow, then the student has to report to the Internship Coordinator or HoD without fail. Student has to demonstrate the working modules of the project in front of the panel of faculty members which includes the faculty facilitator.

3rd and Final Review

Student has to remain physically present for the presentation. Student has to demonstrate the working modules of the project in front of the panel of faculty members which includes the faculty facilitator. He would be evaluated for the fourth and fifth phase of the system development life cycle that is testing, implementation and technical documentation. Before this review the student should have submitted all his IARs.

Maintaining Discipline at Internship associate

The student shall maintain discipline while working on project, and shall not violate rules & regulations of the Internship associates, where the student is taking training. The student shall follow all necessary instructions given by the Engineer-in-charge/external guide of the Internship at company.

Certificate from Internship Authority

At the end of the training, the student is required to obtain a certificate from the Internship Authority (the Engineer In-charge) regarding the satisfactory completion of the Internship training and has to include the certificate in the final Internship report during the Final Presentation/Viva.

Detailed Comprehensive Report

Besides regular reports being sent by the student during training, the student shall submit a detailed, comprehensive typed Report at the end of Internship Training. The requirements and the guidelines for the preparation of such a report are attached (Annexure II).

Final Presentation/Viva

The student shall make a presentation of his/her detailed report of project studies and poster of project, in front of a panel, in person.

Successful Completion of Training

The student shall be granted a successful completion of the term, if all the reports and performance of students, are found to be “acceptable” by the department.

DETAILED GUIDELINES FOR PREPARATION OF VARIOUS REPORTS

The details of all reports and required formats are given below.

1. INTERNSHIP JOINING REPORT (IJR)

The student has to send his Internship Joining Report to the department. The IJR has to be duly signed by his External Guide or the Group Leader of the project. The IJR has to be sent to the department on the same day of joining at the Internship Associates.

2. PRELIMINARY INTERNSHIP INFORMATION REPORT (IPR)

Two weeks after joining the project, the student is required to submit a report with following details.

- A brief note, explaining the salient features of project including major objective of project.
- Scope of work as per definition / specification of project.
- Proposed Project progress schedule, in form of Bar-chart/ Gantt Chart
- Software testing /Quality assurance arrangements
- Detail specification of the project.
- Details of toolsets being used. (Computers, Hardware, Software tools etc.)
- Address of student's stay, with phone no if any, and distance from project associate site with mode of transport used.

3. STUDENT'S ENGAGEMENT SCHEDULE (SES)

After sending the IJR and IPR, student should start planning and finalizing his/her involvement and participation in various activities, under the consultation and guidance of the Engineer-in charge of Internship. The student is required to submit the schedule of Engagement in various activities, at the end of two weeks. This is actually a planning by student for his/her own training. This shall be monitored and compared with the total actual work done and submitted during the 2nd and final review.

4. INTERNSHIP ACTIVITY REPORT (IAR)

After sending the SES, the students are required to participate in various project related activities and management practices. The major objective of the training is to learn project activities of higher and standard order, in a detailed manner. All the PARs shall have main emphasis on project activities and its management aspects.

Some important points in regard to IARs are mentioned below:

- A student is required to send a IAR every fifteen days or a part thereof. This can be done either by sending an email to project internal guide or by submitting the same on Moodle.
- Student shall retain a copy of each IAR with him/her.
- The student shall mention the date, IAR No. and brief contents of IAR on the first page of IAR.
- The Daily Work Sheets (DWS), duly filled, signed by Engineer In-charge/ External guide, must be attached with every IAR.
- Any IAR shall not contain any original documents.
- A minimum of 7 IARs must be submitted to the department.

5. DAILY WORK SHEET (DWS)

A student shall record the work being spent by him in study / learning of specific activities, and enter the same in Daily Work Sheet (DWS) on daily basis. The DWS, duly signed by Engineer in charge or project guide, are to be submitted, along with every PAR.

6. DETAILED COMPREHENSIVE REPORT (DCR)

The student is required to prepare a Detailed Comprehensive Report (DCR) at the end of training, to be submitted within one week after completion of training. The DCR is the compilation of various reports submitted earlier, along with a brief write-up on observations and conclusions. This can also include students' experiences, specific learning, etc. It shall carry a certificate of completion of Internship training from Company / Institute / Organization. This report shall be presented before the jury of faculty members and invited experts, by the student, and a viva-voce shall be taken on the basis of this report.

Other Instructions

- ☐ Each Internship Report page should have a page number.
- ☐ One separator Page with a title for each section.
- ☐ Internship Report should be hard binded or spiral binded.
- ☐ One Student copy and one Institute copy (GroupWise) have to be submitted to the Department.
- ☐ Students may follow the following Report Format for preparing their final report

Detailed Comprehensive Report (DCR).

1. INTRODUCTION

1.1 ABOUT THE COMPANY

1.1.1 Introduction of the company

1.1.2 Quality policy

1.1.3 Communication

1.1.4 Resources

1.2 THE SYSTEM

1.2.1 Definition of system

1.2.2 Purpose and objectives

1.2.3 About present system

1.2.4 Proposed system

1.3 PROJECT PROFILE.

1.3.1 Project title.

1.3.2 Scope of project.

1.3.3 Project team.

1.3.4 Hardware/Software environment in company.

2. SYSTEM ANALYSIS.

2.1 FEASIBILITY STUDY.

2.1.1 Operational feasibility.

2.1.2 Technical feasibility.

2.1.3 Financial and Economical feasibility.

2.1.4 Handling Infeasible Projects.

2.2 REQUIRMENT ANALYSIS.

2.2.1 Facts-Finding Techniques.

2.2.1.1 Interview.

2.2.1.2 Questionnaire.

2.2.1.3 Record Review.

2.2.1.4 Observation.

2.3 CONTEXT DIAGRAM.

2.4 DATA FLOW DIAGRAMS

2.3.1 First level DFD.

2.3.2 Second level DFD.

3. SYSTEM DESIGN.

3.1 System flow.

3.2 Entity-Relationship diagram.

3.3 Data dictionary.

4. User Manuals

4.1 Menu Screens along with Description

4.2 Forms along with Description

4.3 Reports

5. TESTING.

6. FUTURE ENHANCEMENT.

7. APPENDIX

7.1 Tools used.

REPORTS

The student is required to submit the following reports, during his/her stay at the project site.

- 1) Internship Joining Report (IJR)
- 2) Preliminary Project Information Report (PPR)
- 3) Students' Engagement Schedule (SES)
- 4) Internship Activity Report (IAR)
- 5) Daily Work Sheet (DWS)
- 6) Detailed Comprehensive Report (DCR)

The student shall submit all the above reports, as per following schedule.
(Student has to write his / her Name, Roll No. and Report Code at the Top of the first page.)

SCHEDULE FOR SUBMISSION OF REPORTS

Sr. No.	Report Code	Details	Submission Time
1	IAL	Internship Allotment Letter	Before joining the company i.e. before 22-12-2025.
2	IJR	Internship Joining Report	First day of joining the internship associate.
3	PIR	Preliminary Internship Information Report	2 weeks after joining (05-01-2026)
4	SES	Student's Engagement Schedule	Ist report: 3 weeks after joining (12/01/2026) (Submit for every two weeks)
5	IAR	Internship Activity Report	Every Month on 1 st and 15 th
6	DWS	Daily Work Sheet	Along with every PAR
7	DCR Draft	Detailed Comprehensive Report (Draft copy)	10-04-2026
8	DCR Final	Detailed Comprehensive Report (Final copy)	Before the final viva as per the academic calendar

Note:

The dates mentioned in the above guidelines are tentative. However, you will be informed final dates through email before each review.
