1st Jan, 2024 to 31st May, 2024

About the company

Magma is Asia's leading B2B manufacturing services provider catering to over 200 industries actively. Backed by some of the world's leading venture capital firms and with procurement and logistics operations located in over 12 states pan India, building your factory of the future starts with Magma. It offers raw materials, logistics, energy, infra & technical services to help any factory become a Magma powered factory.

Project Definition

1. Maintain and ensure the smooth operation of Magma's server infrastructure
2. Update the official website (magmagroup.in) with any new product launches, business articles or other relevant content
3. Develop a user-friendly SaaS tool (MagPort) that allows factories to book containers for export shipments at the best rates, streamline cargo movement and provide convenience

4. Develop a marketplace platform to help Magma powered factories to liquidate their excess inventory, dead stock and industrial waste (Magma Liquid)
5. Develop a payments software (MagPay) for seamless local and international transactions for sellers and buyers with simplified user verification, handling of currency exchange rates and other complexities

Mr. Neal Thakker
Founder and CEO, Magma
